We have an app for that!

We at Aquatic Weed Control have the knowledge to build our own apps....applications that is. We have developed apps that are provided by our trained and licensed technicians.

If you are looking for an app to.....

- Kill shoreline grasses -we have an app for that!
- Kill weeds in the center of your lake -we have an app for that!
- Remove exotic trees -we have an app for that!
- Add carp and a barrier to keep them from escaping your pond -we have an app for that!
- Remove invasive plants -we have an app for that!
- Planting native plants -we have an app for that!
- Restore a wetland -we have an app for that!
- We have apps for everything Aquatic

Shoreline app

Airboat app

Tree removal app

Carp Barrier app

LANTANA - Invasive plant app is needed here. This plant can be found in nearly every county in Florida. It is a perennial and can be trimmed as a shrub or grows higher than 6 feet. The leaves give off a smell when crushed or rubbed. The ones that flower in only yellow are native plants but the ones with multi-color flowers are the invasive ones. Birds and other animals eat and spread thousands of seeds that quickly take root and invade new areas. AWC has developed an app to take care of this invasive plant.

Lantana-invasive plant app

Planting Natives app

Aquatic Weed Control is your CLEAR choice in waterway management and we have the most apps.
